REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance. The closest prior art made of record fails to teach or suggest a contrast compensation method/apparatus that calculates the cumulative distribution function and re-configures an image signal based on the Formula:

$$CDF(K) = CDF(K) - \frac{CDF(N)}{N \times K} + K ,$$

wherein N is a highest pixel value displayable when the image signal forms an image, and K denotes a pixel value. Therefore, this limitation in combination with other limitations of the independent claims and/or in combination with limitations of the dependent claims is allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
